Professional experience

Scrump LLC**QA engineer**

June 2021 - up to the present moment.

Worked with financial blockchain projects, blockchain explorer, blockchain game. I tested the crypto wallet application, the company's website. In total, I tested 8 blockchain projects.

Was part of the company's project support team.

Testing web application, both client and server parts:

- Searching and finding bugs, bug reporting (Jira);
- Creating and reviewing checklists and test cases;
- Experience with git version control system, cloned and deployed locally an application for testing with VSCode editor using node package manager (Yarn);
- Functional testing;
- Identify, isolate, replicate, report defects;
- Mobile testing (Android Studio);
- Working with API (Postman);
- Interaction with the development team.
